Tetsunao Yamamori grew up in war-torn Japan, knowing physical and spiritual hunger. Today, he is the leader of one of the world’s more respected Christian relief and development agencies, “Food for the Hungry.” In this book, he emphasizes the need for missions within “closed” (to Christianity) and “unreached” countries, mixing evangelism with relief and development. He stresses the need for workers that are totally committed to the great task before us. Set in imaginary “Dhurgistan” (so named to protect the church there) this book is a “serious/humorous/insightful/penetrating look at missions through the not-so-rosy-tinted glasses of a tentmaking veterinarian missionary.” The author shares from three years experience in one of the world’s poorest countries. Included are topics such as leaving friends and relatives, communication problems, language study, dealing with local challenges, and living with your family in a foreign land (with details on child-rearing, pregnancy, and having a baby in a third-world country).

**THE NONRESIDENTIAL MISSIONARY**

* A New Strategy and the People it Serves
  by V. David Garrison
  (MARC) $13.99

In many locations around the world, living permanently in a highly restricted area is not always the best decision for a full-time missionary. This book explores a new concept in missions involvement. The nonresidential missionary is a career foreign missionary who is matched up with a single unevangelized population segment, but who lives somewhere other than in their midst. He surveys the situation, becomes fluent in the main language, and mobilizes every form of ministry to the group. The nonresidential missionary concentrates on initial evangelization, and eliminating gaps or duplications with other mission agencies."

This book explains this new strategy in world missions and includes a fold-out map of the major unevangelized population complexes. For twelve major unreached people group segments, there are additional detailed maps, statistics, and descriptions.
